DETAILED ACTION

Claim Objections

1. Claims 38 and 58 are objected to because of the following informalities:
Appropriate correction is required.
2. claim 38; line 4 - recitation of "the said lockable parts" lacks clear antecedent basis in the claim.
3. claim 58; "any of the" should be deleted.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claims 38-70 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "or the like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d). It's not clear what the scope of elements within scope of recitation should include.
6. Claim 1; limitations of "is mainly transversely in relation to" does not clearly describe geometry/structural relationship.

7. Claim 1; 'as best understood', "when various" should be replaced with –wherein various—to correct grammar.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 38-42 and 64-74 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 5,118,150 to Jarrett.
10. Jarrett '150 teaches Applicant's claim limitations including : a "first locking element" – one of 18,22, a "second locking element" – the other of 18,22, "acting element" – 30, "hinge means" – at 31, "gripping bracket" – portion which engages 18
11. As regards claim 39, Jarrett '150 discloses "safety catch" - 32.
12. As regards claim 69, the solenoid serves as "sensor", performing the recited function.
13. As regards claims 71-74, the disclosed operation of the prior art device anticipates broadly-recited steps.

Allowable Subject Matter

14. Claims 43-63 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

15. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

16. U.S. Pat. No. 3,050,322 to Miller.

17. U.S. Pat. No. 3,247,924 to Price.

18. U.S. Pat. No. 5,865,483 to Dubravin.
